## **SEIZURE LOG**

The Seizure Log will help you keep an ongoing record of your child's seizures. Use it to provide you child's doctor with an accurate report to help diagnosis and treatment. This form allows you to write your own descriptions while the Seizure Observation Record provides a more guided format.

| Date & Time | Length of Seizure | Description of Seizure | Other Details/Information<br>(Such as pre and post seizure conditions) |
|-------------|-------------------|------------------------|--|
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
|             |                   |                        |  |
