

# SECRC MILLWRIGHTS

## SUPPLYING THE FOOD-AND-BEVERAGE INDUSTRY WITH SAFE AND PRODUCTIVE SERVICE

**The food-and-beverage industry, while ripe with opportunity, also faces challenges from intense competition, thin profit margins, changing consumer preferences, rising costs, and new regulations.**

Food-and-beverage manufacturers are turning to advanced technology, automated systems, and cutting-edge machinery and equipment to do more with less. Dependence on automated systems and machinery also means that any disruption, equipment failure, or unplanned downtime could be disastrous for production.

Millwrights from the Southeastern Carpenters Regional Council understand all the new technology, and we possess the skills, specialized training, and hands-on experience to safely, quickly, and properly complete the work. We create a corps of jobsite leaders through communication and leadership training to keep the workplace productive and instill a team-oriented attitude. We are an asset to contractors serving this industry because we train specifically for the unique demands of the food-and-beverage industry.

We are experienced, trained, and excel in high-speed bottling, canning, wrapping, and packaging equipment.

## OUR CAPABILITIES

SECRC millwrights are credentialed to provide installation, maintenance, and repair on equipment, machinery, and automated systems for the food-and-beverage industry with skills in:

- High-Speed Bottling/Canning Equipment
- Wrapping/Packaging Equipment
- Automatic Storage and Retrieval Systems
- Conveyors
- Layout and Planning of Conveyor Systems
- Storage Racks
- Carousels
- Monorails
- Stainless-Steel Welding and Fabrication
- Sanitary Requirements and Guidelines
- Compressors and Pumps
- Agitators
- Blowers
- Bins
- Sifters
- Silos
- Extruders
- Production Ovens
- Forming Machines
- Mixers
- Coolers and Warmers
- Ventilation Fans

## EXCELLENCE GROUNDED IN TRAINING

To support our contractors, the SECRC customizes training to meet changing industry demands. We have the ability to meet specific training needs at the plant or at a nearby training center and deliver training in a timely, cost-effective way to keep productivity humming. Our specialized training includes:

- Machinery Installation, Repair, and Maintenance
- Material Handling Processes
- Bulk Conveyor Systems
- Can Manufacturing Plant Systems
- Monorail Conveyor Systems
- Stainless Steel Welding and Fabrication
- Basic and Advanced Layout and Leveling Instruments
- Basic and Advanced Laser Shaft Alignment
- Precision Alignment
- Lift Truck Operator Certification
- Third Party Certified Precision Rigging
- Valve Installation and Repair
- Layout and Blueprint Reading
- Construction Mathematics
- Clean Room Procedures
- Rotating Alignment

## SUCCESS GROUNDED IN PARTNERSHIPS

Working together with our contractor partners, we...

- Get systems up and running quickly;
- Work according to sanitary guidelines;
- Ensure new machinery is properly aligned and operating efficiently;
- Perform routine preventive maintenance to help protect and extend the lifespan of existing equipment; and
- Customize a maintenance program to keep operations running at their most efficient and productive levels.

SECRC millwrights are stationed throughout the South so we can respond quickly to emergencies and provide experienced craftspeople that our partnering contractors rely on and have come to trust. They in turn improve a facility's overall productivity and serve their customers better and faster.

## SPECIAL ATTENTION TO SAFETY

There is no substitute for solid attention to safety, and the SECRC believes a safe work site is achieved only by comprehensive training for every millwright on every project. Our members must complete and achieve mastery of the following health and safety training programs:

- Blood Borne Pathogens
- Cardio Pulmonary Resuscitation
- Confined Space Worker Safety
- Fall Arrest
- Hazardous Waste Worker Safety
- Lock-Out/Tag-Out Safety
- Material Safety Data Sheet Competency
- Millwright Health and Safety 16-Hour Course
- Occupational Safety and Health Act 30-Hour Course
- Scaffold User Safety

**Bottom Line** By using SECRC millwrights, you are assured quality, productive work, from pre-planning to maintenance. Our promise is simple: • We will work safely, accurately, and dependably. • We will respond to all requests promptly and will deliver the service that we promised. • We will communicate early and often and will involve the customer every step of the way. • We will complete projects according to specified schedules with pride and integrity.

**Your goal is our goal.**
